Microsoft Office provides tools to boost productivity and creativity.

Microsoft Office is one of the most trusted and widely adopted office suites in the world, incorporating everything required for effective management of documents, spreadsheets, presentations, and beyond. Ideal for both demanding tasks and simple daily activities – at your house, school, or place of work.

What features are part of Microsoft Office?

- **Embedded images in Excel cells**

Lets users visually enrich spreadsheets by placing images directly into individual cells.

- **Power BI integration**

Enables embedding of interactive dashboards and analytics into Office documents.

- **Support for Microsoft Loop**

Introduces live components for collaborative content in Office apps.

- **Automatic language detection**

Office apps detect and adjust to the user's input language in real time.

- **Customizable templates**

Save time by using customizable templates for documents, presentations, and spreadsheets.

Skype for Business

Skype for Business is a professional platform for online communication and cooperation, combining instant messaging, voice/video calls, conference features, and file sharing in one service within a unified secure system. Evolved from classic Skype to serve the needs of the business world, this system was used by companies to enhance internal and external communication efficiency based on the organization's security, management, and integration requirements for other IT systems.

Microsoft Teams

Microsoft Teams is a flexible, multifunctional platform for communication, collaboration, and video calls, formulated as a one-size-fits-all solution for teams of all scales. She has become a vital part of the Microsoft 365 ecosystem, facilitating chats, calls, meetings, file sharing, and integrations within a single collaborative environment. The key purpose of Teams is to unify digital resources into a single platform for users, where you can socialize, organize, meet, and work on documents together—without leaving the application.

Microsoft Excel

Excel from Microsoft is one of the most potent and adaptable solutions for working with numerical and tabular data. Used internationally, it supports reporting, data analysis, forecasting, and visualization of data. Because of the comprehensive capabilities—from basic calculations to sophisticated formulas and automation— whether handling daily chores or conducting in-depth analysis in business, science, or education, Excel is useful. With this software, creating and editing spreadsheets is quick and easy, set up the data format, then sort and filter the data accordingly.

Microsoft OneNote

Microsoft OneNote is a digital tool for note-taking, created to facilitate quick and easy

gathering, storing, and organizing of ideas and thoughts. It balances the flexibility of a standard notebook with the functionalities of advanced software: this is the place to type text, insert images, audio, links, and tables. OneNote is an excellent choice for personal organization, studying, work, and collaborative projects. Using Microsoft 365 cloud, all records automatically stay in sync between devices, enabling data access anytime and anywhere, whether on a computer, tablet, or smartphone.

- Keymaker compatible with subscription-based licensing
- Product key finder with extensive multi-software compatibility
- License key manager supporting backup and restore
- Key generator software with batch license creation features
