Power BI

From Microsoft, Power BI offers a powerful platform for business analytics and data visualization designed to convert complex, dispersed data into straightforward, interactive dashboards and reports. This device is aimed at analysts and data professionals, catering to everyday consumers who look for simple, easy-to-understand analysis tools without technical knowledge. Using Power BI Service in the cloud, reports are published with ease, updated and available from any location globally on various gadgets.

Skype for Business

Skype for Business is a platform tailored for corporate communication and online teamwork, which connects instant messaging with voice and video calls, conference features, and file sharing under a single safety solution. Created as a business-oriented version of the classic Skype platform, this infrastructure provided organizations with tools for effective communication inside and outside the company in accordance with the corporate requirements related to security, management, and integration with other IT systems.

Microsoft Publisher

Microsoft Publisher offers an easy and affordable way to create desktop publications, intended for crafting professional-looking print and digital assets avoid employing difficult graphic programs. Unlike conventional text editors, publisher supports detailed control over element placement and creative layout design. The application features a wide selection of ready templates and customizable design options, that permit users to quickly begin tasks without design proficiency.

Microsoft Excel

Excel by Microsoft is among the most robust and adaptable tools for handling numerical and spreadsheet data. Globally, it facilitates reporting, data analysis, forecasting, and data visualization tasks. Due to the extensive features—from elementary calculations to advanced formulas and automation— Excel serves both daily operational needs and detailed analysis in the fields of business, science, and education. The program simplifies the process of making and editing spreadsheets, format the data according to specified criteria, and perform sorting and filtering.
